MyFlightSolutions

Career Opportunity: Sr. Developer – RAILS MyFlightTrain Team
(Send resumes to careers@myflightsolutions.com)

Position:

Are you ready to join a team of highly skilled developers in a fast paced startup atmosphere?

We are a fast growing technology company in the aviation field seeking a highly skilled, senior level, full stack Ruby on Rails developer. Join the team at MyFlightSolutions and you will be able to take on the role of developing cutting edge features and maintaining a quickly growing suite of aviation modules.

What will make you successful:

- Do you enjoy learning and pushing the limits of what can be done with cloud based software?
- Are you a Self Starter, and can quickly understand a complicated code base?
- Do you have 5+ Years or experience in Ruby on Rails (3.2, 4.0)
- Do you have Front end design/development experience and highly skilled with JS/Coffee-script?
- Working knowledge of Amazon AWS environment for SaaS applications?
- Knowledge and experience using SQL (both MySQL and SQL Server) ?
- Fluent in distributed version control using Git? Tools like Pivotal?
- Enjoy the startup atmosphere and willing to work remotely (at home) and travel to meet up with other team members or customers when needed?

Description of Position

The developer will be a senior and key member of the development team and work with the lead architect and developer on new functionality as well as re-factoring of some aging areas of the system.   The person will need a deep understanding of the entire RAILS stack as well has heavy Javascript.

There are also a set of iOS and eventually Android application that are supported as well as some non-trivial integration with a .Net application.

Requirements for the Position:

5+ years of Ruby on Rails (3.2+, 4.0+) with Bootstrap and heavy Javascript
REST API Expertise
MySQL V5.6 & SQLServer
Github Expertise with multi-server deployment experience
